

Industrial PCs

rugged and reliable

For the toughest demands
Water and dustproof up to IP69k
Simple touch screen operation

20 years of experience

with completely sealed Industrial PCs

Developing innovations, optimizing processes, and building on existing strengths – modern technology ensures that companies meet and exceed the challenges facing the modern business enterprise each and every day. The demands placed on industrial hardware are the same as those put on machines and production plants.

At noax, we have set a goal of meeting those demands. For over 20 years we have focused our attention exclusively on the proprietary development and manufacturing of rugged and reliable Industrial PCs. In everything that we do - from development and production to service and support - one thing is always at the center of our attention: the customer! Numerous references from a variety of industries around the world will prove that.

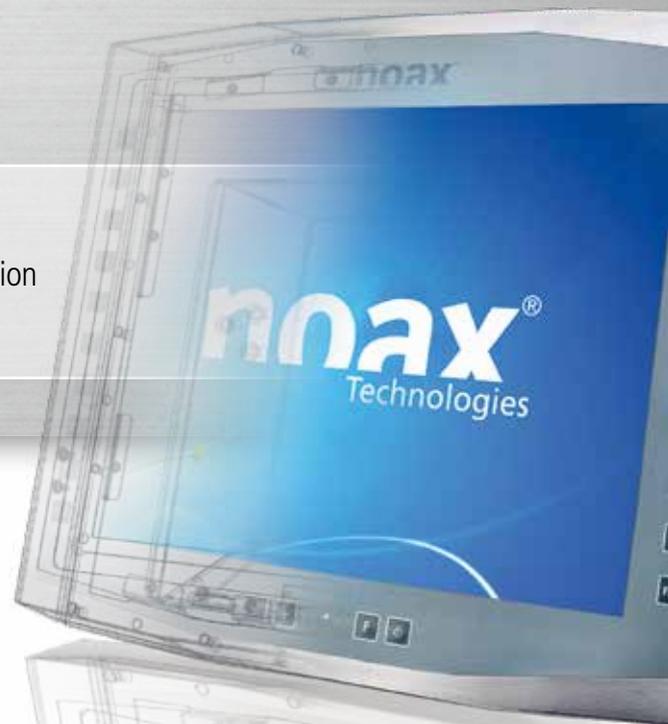

Winkels Getränke Logistik GmbH

"It was one experience in particular. Your sales rep put a screwdriver in my hand and said, 'Here, open it up and take a look for yourself!'"

noax Technologies

20 years of experience and expertise
Complete proprietary development and production
Industrial PCs for extreme conditions

Quality without compromise

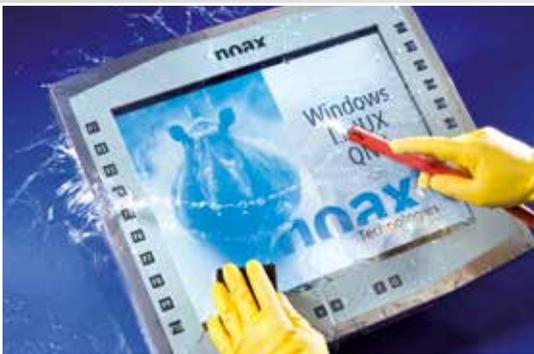

with comprehensive in-house-development

The proprietary development of our motherboards and a strict quality management policy guarantees that our hardware will live up to the lofty demands of the industry. As the customer, you will get a product that has no compromise.

“Made in Germany”: We produce only the most carefully selected, industry-ready components in our facility in Ebersberg near the Bavarian capital of Munich. This consistency guarantees the availability of our components for at least five years. For you, that means increased protection of your investment and more stability for the future.

Our high quality standards are reflected in numerous certificates, accreditations, attestations and technology partners.

Components and features

for use in the most extreme industrial environments

- | | | | |
|--|--|---|--|
|  Diagonal screen sizes of 12 to 21.5" |  Protection class IP65; IP67; IP69k |  Housing made of V2A stainless steel |  Touch display with touch-screen keyboard |
|  Rugged industrial design |  Low power consumption |  No external fans |  Shock and vibration-resistant |
|  Automatic brightness control |  Sun and heat-resistant |  Cold resistant up to -30° C |  Dirt and dustproof |
|  Monitoring by microcontroller |  DIO module start function |  RFID |  Freely programmable function keys |
|  HDD / CF / SSD RAID |  Up to 8 GB RAM |  Standard interfaces |  WLAN / GPS / cellular network |
|  Intel chips and processors |  Windows |  Linux |  Available as a Thin Client |
|  Stand-alone |  Easy Mounting |  Hygienic design |  Front USB |

noax IPCs optimize your production processes

to document the datas from the machines

Simplified viewing and data entry, flexible operation of large plants, comprehensive control of production, and quality assurance - noax Industrial PCs bring the benefits of modern IT and communications technology to your production facilities. They distinguish themselves from the competition with their completely sealed, shock-proof and vibrationresistant construction. The rugged design of our computers guarantees absolute reliability without malfunctions or operational interruptions. A variety of interfaces and a large line of accessories ensure that you will not only be able to integrate

our Industrial PCs, thin clients and weighing terminals smoothly into your current IT setup, but also expand and adapt them to the specific needs of your company. Touch screen protective films, special connector covers to protect the interface area and an uninterrupted power supply provide you with enhanced security. The RFID readers and high-performance WLAN offer you flexibility, while memory upgrades give your IPC more power. In short, the right add-ons make an intelligent computing center out of any noax Industrial PC, and you can design it precisely to fit your needs.

Industry solutions

Automation & Production

Automate functions
Increase transparency
Gain added value

Efficient data processing

noax industrial terminals reliably collect and log product, operating, machine and employee data. This creates transparency for all of your processes and also reduces processing times, increasing your flexibility.

Reliable operation of machine control

Industrial computers from noax accurately control your production plants. Despite dust, moisture, vibration or shock, they guarantee absolute reliability, even in 24-hour continuous operation.

Clear display of visualized processes

noax IPCs display processes clearly and in real-time. The high-contrast touch screen (up to 21.5") improves readability and operation. It gives you an overview of all processes, so you can respond in real time.

Special features include:

B/S/H/

BSH Bosch und Siemens
Hausgeräte GmbH

16 years in use: "We have not found anything that can compare to the robustness of a noax computer."

noax vehicle PCs optimize your logistics and reduce your transportation costs

Faster picking, more reliable delivery, increased overall efficiency - noax Industrial PCs capture data where it appears on the production floor or out in the field. Through WLAN or GPS and Cellular Network, information is immediately available to the entire company. Thanks to the internal UPS, you can avoid power outages thus increasing your productivity. In addition, noax uses our own configuration tool, nSetup, to facilitate simple implementation of safety functions. Due to their rugged design, our computers are ideally suited for extreme conditions:

shocks and vibrations, cold-storage temperatures, or abrupt changes in temperature. Even in rain, snow and ice they function flawlessly because of their completely sealed enclosure. Their ergonomic touch panel is easy to use, providing good readability in bright sunlight. Our comprehensive line of accessories and add-ons include mounts, scanners and keyboards which allow you to design your workplace to fit your company's needs. We have the right solution for you to help lower your logistics costs.

Industry solutions

Warehouse & Logistics

Optimize the flow of information
Accelerate order picking
Increase customer satisfaction

Speed up order picking in your warehouse

Forklift PCs from noax turn pallet trucks, ground conveyors, forklift trucks and commercial trucks into mini data centers. They are perfect for recording the movements of goods directly on site and in real time.

More efficient production logistics planning

Order-picking computers from noax display the goods in stock, record production data and visualize processes - all on the way to production. They identify potential and improve productivity.

Work more effectively with trucks, cranes and other machinery

noax IPCs in vehicles, construction machinery and agricultural equipment can calculate routes, record loads, measure goods and document performance. Especially on rough terrain, these computers defy external elements such as dust, dirt, moisture, shock and extreme temperatures.

Special features include:

noax IPCs improve productivity and increase quality with consistent hygiene

More efficient production, increased quality, improved competitiveness - stainless steel Industrial PCs from noax give you the boost needed to improve overall quality. You will not only be able to satisfy the lofty demands of both consumers and regulators, but also improve your ability to compete in a tough marketplace because the reliability of noax hardware reduces error rates to virtually zero. Our Steel Series Industrial PCs were conceived for use in hygienic environments with rigorous standards. The intelligent design is ideal for working in food processing, pharmaceuticals, chemicals and

refrigeration sectors. Industrial PCs from noax are completely sealed up to protection class IP69k. As a result, they can be fully cleaned, regardless of whether you use hot water, pressure washers or stringent disinfectants. They are also easy to operate due to up to 20 freely programmable function keys as well as the touch screen. The display guarantees optimum readability even in the worst of lighting conditions. noax IPCs not only increase efficiency and hygiene in production, but provide noticeable improvements in overall system reliability.

Industry solutions

Food & Hygiene

Improve hygiene
Rationalize processes
Increase security

Produce hygienically in the food processing sector

Stainless steel Industrial PCs from noax manage machines, monitor formulas and help provide documentation support. Therefore, they meet the strict EU directives and FDA Standards for traceability and hygiene.

Measure with greater precision in pharmaceuticals and chemicals

noax Industrial PCs and weighing terminals help visualize and monitor operations, even in clean room conditions. This makes your entire production process more transparent.

More reliable capture in refrigeration

noax Industrial PCs mounted on warehouse vehicles such as forklifts, can withstand cold-storage temperatures as well as abrupt temperature changes. Perfect for use in refrigerated storage facilities.

Special features include:

Bell

„Hygiene, stability, quality and a cooperative partnership with our suppliers are the most important criteria for us when selecting hardware“

noax IPCs offer the highest hygienic standards and economize work with extreme user friendliness

Determine the exact formula, check for the right mix ratio, tighten production: with the help of our noax industrial computers, you can correctly control the formula of chemical elements, document the entire manufacturing process and ensure traceability. In the manufacturing of chemicals or medicines, even the smallest deviations or even impurities can cause considerable damage. noax Industrial PCs assist in the creation of recipes, capturing of production data,

help monitor of production, visualize production processes, and much more. In combination with the scale accessories, you have the option of immediately determining, displaying and storing exact measurement results. Hardware from noax perfectly meets the demand for chemical and pharmaceutical companies for the most modern and rugged hardware on the market.

Industry solutions

Pharmaceuticals & Chemicals

Analyzing faster
Working more efficiently
Improving recipes

Faster capturing in the creation of recipes

Easy processing of predefined workflows on the noax IPC touch-screen, measurement results displayed, corrected, saved and documented in seconds. This guarantees faster capturing of the creation of recipes.

Exact visualization in the manufacturing of medicine

noax IPCs visualize from the lab right up to production diagrams or processes reliably, fast and accurately. This ensures more efficient working on a daily basis.

Analyze formulas more efficiently

Multiple interfaces and connections allow several measuring and testing devices to be connected. Different tests are controlled and bundled from only one PC.

Formulas can be analyzed faster and more efficiently.

Special features include:

Krewel
Meuselbach

Krewel Meuselbach GmbH

"The noax IPCs, they just work. There's really no other way to say it."

noax weighing terminals accelerate your processes and work seamlessly due to integrated weighing technology

Nothing works without scales. Exact weight specifications are the basis for calculating prices, fuel requirements or storage space - in any industry. The precise inspection of weight information plays a decisive role in almost all transactions. noax weighing terminals determine this information regardless of whether it is a small volume for pharmaceuticals or tons of materials in ore mining.

They combine the advantages of electronic scales with high-performance industrial computers, emphasizing precision, durability and flexibility. noax machines are built to withstand vibration and operate on a 24-hour schedule. They can be used in an

extended range of temperatures, from freezing Arctic to hot and humid. An additional benefit is their distinctly efficient power consumption.

Numerous interfaces allow for a variety of flexible uses. For example, you can connect up to two load carriers with DMS weighing cells to the IPC using the special Windows-based interface, including floor scales, overhead rail scales, in-floor scales or vehicle scales. All information can be saved, edited and tracked in real time. Weighing terminals from noax are the intelligent connection between scales and your IT network.

Industry solutions

Measuring & Weighing

Simplify calculations
Improve weight measurements
Increase productivity

Speed up communications in your warehouse

noax weighing terminals accelerate weighing processes because all information is saved electronically and therefore immediately available for processing. That information is then accessible to the entire company in real time.

More efficient weighing in hygienic environments

Weighing terminals from noax capture, save and process all scale data in a traceable manner. This allows the entire company to easily access information in real time. This makes the whole value chain more transparent and highly productive.

Low-cost manufacturing

noax weighing terminals accelerate manufacturing because they capture and save scale data electronically, making them immediately available for processing. Production planning, manufacturing and various control processes can all be closely synchronized as a result.
