

Press Release

Exceptional Design & 100% Reliability - New industrial PCs for demanding logistics applications

Introducing the new L10, L12 and L15 Logistics Computers. noax Technologies continues to expand their new multi-touch rugged PC line. The high quality and ruggedness, combined with modern PCAP touch technology, is now available in a slim new design - perfect for mobile use.

The new logistics terminals are impressive with the combination of noax's proven quality, the latest technology and a slim design. The new design has an elegant all-glass front and aluminum housing. Despite the size, the new design has several capabilities, including WiFi, GPS, UPS battery and RFID multireader, integrated into the PC. The capacitive touch provides flawless functionality from edge to edge enabling ideal ergonomic use, even while wearing gloves. The front panel consists of a resistant, hardened safety glass forming the basis for the robust multi-touch. Integrated multi-function buttons are easy to customize in intuitive nSMART user interface. Additional customizations can also be set up using the nSMART software.

Water, dust, constant vibration and extreme temperatures are no threat to the new logistics terminals. They can reliably withstand the most challenging industrial vehicle applications. The L10, L12 and L15 logistics terminals are certified according to protection class IP66 and are perfect for use in everyday logistics processes, strict requirements and in extreme conditions. noax industrial computers provide the latest technology packed in the most modern and sleek design.
