Press Release

noax RFID readers:
Rugged. Reliable. Compatible

The noax RFID readers are compatible with current RFID standards- Hitag, Mifare, Legic® and HID prox. They are programmable and come in a variety of different versions and protection classes designed specifically for use in industrial environments.

Authentication guaranteed under the toughest conditions

As the demand for traceability grows, so does the need for employee authentication in the different divisions of a business. The noax RFID reader can be used in all areas from harsh industrial environments to space-saving applications in logistics, and areas where sanitation is critical. Customers can choose between a stand-alone solution, an add-on, or complete integration in noax industrial PCs or logistics terminals. The RFID readers are available in protection classes IP65 (NEMA 4), IP66, or IP69K, therefore, offering complete protection from dust, splashing water and pressure washing.

Compatible and configurable

The RFID reader easily integrates with the existing software and hardware infrastructure. It it is compatible with common RFID standards: Hitag, Mifare, Legic®, HIDprox, ISO14443, and smart card applications, according to PC/SC specifications, are supported.

Connection with the existing software is simple and easily integrated. With different connection options, such as keyboard emulation or virtual COM ports (self-operating or host-controlled), and a programmable interface, the RFID reader is equipped for a wide range of applications. For future modifications, the reader can be configured remotely, offering maximum investment security.

With its flexibility, broad range of applications and unique compatibility, the noax RFID reader is the best option for employee authentication in an industrial environment. Principle use cases for the noax RFID reader are ERP, BDE, and time-and-attendance applications for the software industry, food industry and logistics.
