

Press Release

noax Quality Management - Certified According To ISO 9001:2015

ISO 9001 – a quality management system. noax Technologies has been certified according to ISO 9001 for several years. This certificate highlights the exceptional quality and reliability of noax products. Consequently, noax implements a continuous improvement process (CIP) every day in regards to products and work processes.

Product quality is the foundation for success. Quality products are the result of high-quality components, many years of experience, and excellent processes. noax has provided top quality products for over 25 years and continues to optimize its quality management according to ISO 9001, which is also audited regularly by TUV SUD Group.

Quality management according to ISO 9001 focuses on ensuring continuous improvement, a strong customer focus and ensures products and services are consistently excellent quality. In addition to a seamlessly documented manufacturing process, all noax industrial PCs undergo several tests during production with a special focus on an exhaustive burn-in test. Every noax industrial PC must pass this burn-in test successfully and without any errors for a period of 48 hours before it is shipped to the customer.

To ensure the high quality of the products, noax has the industrial computers inspected regularly by external, independent laboratories. This allows them to be tested for suitability for different environmental conditions, such as the protection class. The protection class indicates how well a device is sealed against dust and water. For example, in metalworking, where dust and lubricants are common in the environment, a device certified according to protection class IP65 (NEMA 4) is recommended. If the devices are intensively cleaned with a high-pressure cleaner, as this is often required in the food processing industry, a noax IPC with an IP69K protection rating will function reliably. noax offers the right industrial PCs for these and many other applications.

noax is a reliable partner for its customers and proves this with an ISO 9001 certification. noax industrial PCs - Rugged. Reliable. Innovative.
